RE: Trans-Tel Central, Inc.  
100 Industrial Dr.  
Cassville, MO 65625

Subject: Letter of Recommendation

To Whom It May Concern:

This letter is written as a strong recommendation for Trans-Tel Central, Inc.

Trans-Tel was selected as the prime contractor to construct an 1100 mile FTTH network. Both aerial and buried construction was involved. Project began work in February, 2016 and will be done in a 5 year period and broken into 8 phases. This project is expected to be completed by 2021.

The project involved a significant amount of coordination, not only between Barry Electric Cooperative and Trans-Tel, but also with the various sub-contractors and our Engineers.

Trans-Tel's management team managed the project so that Phase 1 was done before scheduled dead line and within budget. Equally important, they did so without offending either the sub-contractors, Communication Consultants and Barry Electric/goBEC employees. This involved daily coordination between the OSP Site Manager John Sanders and his teams.

Trans-Tel's hands-on approach to project management, both aerial and buried construction, billing and ending with the clean-up work was quite impressive. Their coordination of conditions with their sub-contractors was also phenomenal. They truly offered first class service on our FTTH project. We will definitely place Trans-Tel at the top of our list should another project be needed.

Based on my experience and the satisfaction with the outcome of our project, I highly recommend Trans-Tel Central, Inc. They truly provide a high-level of value-based service.

Respectfully,

A handwritten signature in black ink, appearing to be "JR Smith", written over a light blue horizontal line.

JR Smith  
General Manager  
goBEC Fiber Network  
Barry Electric Cooperative.
